Microsoft 365 Migration and Support

Helping organizations migrate seamlessly to the cloud. We have managed some of the most complex SharePoint migrations in the federal government. We support the full migration lifecycle with complete solutions that provide the most advanced security and productivity capabilities.

- Migration and Infrastructure Planning
- Governance, Configuration, and Deployment
- Adoption and Training
- Security and Compliance
- Administration

Architecture Guidance and Roadmap Development

We help organizations create a roadmap for increasing ROI through improved knowledge sharing, business process automation, and increased visibility into line-of-business data.

Business Process Automation

Boost business productivity to get more done by giving everyone the ability to automate organizational processes. Microsoft's Power Platform can provide no-code solutions, automations, and analytics to power your organizations' day-to-day work.

Customized SharePoint Development

Our talented developers can create customized web parts, workflows, and solutions to target your specific business needs.

Customized Out-of-the-box Solutions

SharePoint is a powerful tool whose out-of-the-box functionalities can solve even the most complex of business needs. We can optimize your SharePoint environment to take advantage of its existing functionality.

Administration Support

We can simplify the administration and management of your Microsoft 365 (M365) tenant using time-tested best practices.

Who We Support

Department of Energy

Unified SharePoint Online Intranet

Supported the architecture and development of a **unified SharePoint Online portal** to span the entire Department of Energy. Specific challenges faced in the effort were a unified AD system in Azure, **Security and Compliance** for documents, repurposing existing information siloed in legacy systems, intuitive universal navigation, and a global searchable organization chart. Uses modern tools such as **Power Automate, Azure** and other **Government Cloud** SharePoint Online/Office 365 out-of-the-box features to solve business challenges.

Pension Board Guarantee Corporation

SharePoint Online Application Support

Worked closely with the client to **launch SharePoint Online**. Refined requirements for business applications to meet the needs of the organization. Provided on demand support for **application development** to support a large government entity. Used **PowerAutomate** and other Government Cloud SharePoint Online and **Microsoft 365** out-of-the-box features to solve key business challenges.

Department of Homeland Security

United States Secret Service SharePoint Migration

Supported the planning and executing a full **migration** from SharePoint 2016 on-premise to SharePoint Online. Developed the **information architecture**. Oversaw the migration of nearly 600 sites containing approximately 6,000 pages using **ShareGate**. Managed the re-implementation of 52 apps as **SPFx** or **PowerApps** solutions and the rebuilding of 50 workflows.

DOJ Office of Justice Programs

SharePoint Farm Management

Provided **SharePoint farm management** for an environment that includes twelve web front-end servers, fifteen application servers and four scalable **SQL server** clusters. The Farm hosts 110 SharePoint applications and twenty external applications. Built highly used, custom applications to support the needs of their program offices.

In support of these customers, we've worked with the following prime contractors:

- GDIT
- Perspecta
- Modis
- Peraton
- Accenture
- SAIC

ABOUT US

Our company name was inspired by the bamboo plant – strong, flexible, and easily adapted for a variety of global solutions. Today, by adding the consulting services of SharePointXperts to the Bamboo family, we have become a global-leading provider of enterprise-class software applications and consulting services designed to extend the native capabilities of Microsoft SharePoint and Microsoft 365. So far, over 8,000 organizations world-wide have chosen to enhance their SharePoint deployment with products, solutions, and services from Bamboo.

We offer not only unparalleled Microsoft 365 experience but the Agile methodology and toolset to create a sustainable environment that will serve the long-term needs of our customers.
